Gilad Wein

Senior Data Engineer

Self-learner who builds things out of curiosity — from data platforms to OOAKY, a marketplace I built that has run in production for years.

Core Stack

Data platform
BigQuery (deep), ClickHouse, dbt, warehouse & lake architecture

Orchestration
Argo Workflows, Temporal, Pub/Sub, Dataflow

Platform & DevOps
Kubernetes, ArgoCD, Terraform, GCP, AWS

Reliability
Observability, alerting, self-healing pipelines, cost optimization

AI-First Engineering

- Claude Code, Codex, Cursor, Gemini
- Building and running autonomous ops agents
- Reviewing and steering AI-written code at scale
- CI and testing for dozens of PRs a day

Education

- B.Sc. Mathematics (in progress), The Open University
- Certified Music Producer, LFO School

Personal

- Leader and mentor; great teammate
- Excellent presenter
- Self-learner who owns systems end to end

Work Experience

Alison AI
Senior Data Engineer · 05/2025 – Present

- Built the data platform and its infrastructure from scratch: self-managed, self-recovering Kubernetes with Argo Workflows and ArgoCD, tens of TBs a month into BigQuery
- Run dozens of AI agents that watch logs and alerts, investigate and fix issues on their own
- Kept the app stable with dozens of PRs merged daily; mentor juniors to judge AI output and build the right way

OOAKY · ooaky.com
Creator & Builder · in production for years

- Built a social marketplace for handmade and vintage goods end to end — shops, listings, collections, multi-currency

Triple Whale
Senior Data Engineer · 02/2023 – 02/2025

- Planned and built the new data system on GCP with BigQuery, ClickHouse and Temporal: revertible, self-recovering pipelines
- Handled huge data volumes at controlled cost; storage-agnostic and fast for the app to consume
- Owned monitoring, alerting, DataOps and DevOps; automated 100% of manual operations

Roundforest
Senior Data Engineer · 2021 – 2023

- Designed and built a new data ecosystem for 40M monthly users — GCP, BigQuery, dbt, serverless
- Data quality and cost: semantic layers, validation, anomaly detection, cost guardrails
- Fast self-serve analytics in Looker; a Slack bot for on-demand jobs and data requests

Tailormed
Senior Backend Engineer · 2017 – 2020

- HIPAA-compliant microservices on AWS; ETL, hospital integrations, encrypted-PHI querying

Earlier

- **Shupperz**, Software Engineer · 2016–2017 — first developer; owned infra and DevOps
- **MusikWay**, Founder & CTO · 2014–2016 — built the startup and 90% of the product
- **Mount Carmel Health System**, Full-stack Developer · 2013–2014
